

Are you happy losing money and time when you print?

Thought not. Our Cloud Printing solutions are a breeze.

Cloud Printing

You may very well have heard the phrase 'Cloud Printing' floating in the air. Or, maybe you're already aware of its growing importance. ABC Managed Services can move your printing to a reliable, secure public cloud which is flexible, and doesn't require your own on-site hardware.

Local print solutions can be so limiting!

With flexible and secure cloud printing you'll make savings 24/7. **The sky's the limit**

- ✓ No need for on-site servers
- ✓ No need for on-site IT support
- ✓ Accessible from anywhere, any time
- ✓ Saves time, money and waste

Cloud Printing

POWERED BY abc

Get that floaty feeling with Cloud Printing

Some Cloud Printing solutions may leave your company grounded. If your Cloud Printing is based in a local hybrid cloud, you'll need an on-site server. This means your staff will only be able to print in your workplace; and once they float away into the wide blue yonder, they'll be struggling.

ABC Managed Services can show you the steps that will lift you up into the higher echelons of versatility and security. We're uniquely positioned to offer the flexibility needed to optimise all aspects of your IT, technology and process infrastructure across your **WorkPlace**, **WorkForce** and **WorkFlow**.

Cloud Printing controls upfront costs

You don't have to worry about buying extra hardware, supporting it, upgrading it, powering it or physically finding space for it. Because we do all that for you.

With Cloud Printing every printer is on hand

ABC Cloud Printing allows your people to work on the road, from home, or from hot desks. It simply allows you to print anywhere, to any authorised online device.

Make real-time savings, all the time

You can monitor usage day-by-day and department-by-department, so you know exactly when and where materials like new toner and paper are needed.

Don't get jammed-up with paperwork

With a centralised cloud-based service, anyone can access and monitor print data. This means your department or team can better monitor and control your use of resources.

Cloud Printing enhances security & compliance

The cloud is a reliable, affordable and space-efficient way to protect your data against power outages, physical break-ins and cyber criminals.
